TMPM DIGITAL PRODUCTS & AUTOMATION

TMPM Bespoke Dashboards & Workspaces

Put the right information in front of the right people.

Dashboards that support decisions

Agree the measures, source data, update rhythm and decisions the view must support. Keep definitions, ownership and uncertainty visible.

Workspaces around a real workflow

Connect the relevant actions, documents and collaboration routes. Design roles and responsibilities before deciding on the technology.

Implementation and handover

Start with a bounded prototype. Test data, permissions and user tasks, then agree training, support, monitoring and ownership.

A clear brief before the build

Provide current reports and processes, data definitions, user groups, access needs and system constraints. Live feeds, identity, integrations and licences need discovery; a prototype alone is not an authenticated operational service.

Talk to TMPM

Discuss your priorities and agree a practical starting point.
