TMPM TRANSFORMATION & IMPROVEMENT / P2

System Reset Sprint

Restore control, flow and performance.

TMPM Performance Suite | 12 WEEKS

Who it is for

ASC, community health, urgent care and place leaders facing sustained pressure, poor flow and limited visibility of performance. Built for operational and transformation teams.

How we help

Reset high-pressure pathways, clarify roles and thresholds, and rebalance capacity. Introduce focused measures, weekly review and escalation. Implement quick wins and track their effect in real time.

What you leave with

Unblock pathways. Address delay and duplication across front door, discharge and reablement.

Restore oversight. Put governance, accountability and a useful delivery rhythm in place.

Show progress. Track waits, throughput and people's experience.

Align partners. Clarify decisions and responsibilities across ASC, NHS and providers.

Scope, timing, responsibilities and success measures are agreed for each engagement.

Talk to TMPM

Discuss your priorities and agree a practical starting point.
