TMPM TRANSFORMATION & IMPROVEMENT / T1

Life-Course System Design

Design a coherent system for living well at every life stage.

TMPM Transformation Suite | 8-12 WEEKS

Who it is for

ASC, public health, place, primary care and commissioning leaders ready to connect prevention, community assets and long-term sustainability.

How we help

Define a whole-system model for living well. Connect health, social care, voluntary and community services, then translate the model into outcomes, investment priorities and a sequenced roadmap.

What you leave with

Living well. Define the offer across life stages.

Connected partners. Align ASC, health, voluntary services and community assets.

A deliverable model. Agree outcomes, investment priorities and the roadmap.

Scope, timing, responsibilities and success measures are agreed for each engagement.

Talk to TMPM

Discuss your priorities and agree a practical starting point.
